

SODEMANN-Springs.US

Environmental policy

Sodemann-Springs.US ApS is a trading company with an office and warehouse – no production. Sound operation is fundamentally based on the use of common sense in all areas. Naturally, this also applies to environmental issues. Sodemann-Springs.US ApS focuses on protecting our shared environment to the best of our ability. We have no association with hazardous chemicals or other harmful products. We sort our waste: plastic – metal – glass – cardboard, etc. All waste is disposed of, in sorted form, at nearby recycling stations. We follow all recycling station rules to ensure compliance with environmental requirements. If customers are unsure how to dispose of worn-out items purchased from us, they are welcome to send them to us for correct disposal.

Jørgen Sodemann
